At this event, each country will have a stall upon which to exhibit different products and materials associated with its school health, nutrition and HIV prevention activities. The aim of this session is to enable countries to share information with each other, and showcase examples of excellent materials. Please do bring along IEC materials (posters, brochures, etc.) and reports that will enable you to tell your country’s story.

This evening will also be a social time for you to get to know facilitators and country delegates better over cocktails and food. Local NGOs will be encouraged to join the event.

Computers

It would be a great help if you are able to bring a laptop computer with you to the course. If this is not possible, please don’t worry as writing materials will be provided.

SECTION 3: WORKSHOP FRAMEWORK AND ISSUES

The course is built upon the four pillars of FRESH (Focusing Resources on Effective School Health):

1. School health related policies
2. Skills-based health education
3. School based health and nutrition services
4. Provision of a safe school environment

In addition, the course covers the FRESH supporting strategies (multisectoral partnerships, community partnerships, student participation) and practical aspects of programme management, monitoring and evaluation.

On Day 1, you or your country team will be asked to prepare and present a presentation of no more than 10 minutes to describe the following three items:

1. One key moment of success in your country’s SHN initiatives
2. One key programme/initiative you wish to highlight with regards to reaching the most vulnerable children
3. What you wish to get out of this course

A standard template for the presentation will be provided. Computers will also be made available for this purpose. This will give everyone an opportunity to learn what each other is doing and share their experiences. As the general aim of the course is to strengthen your existing plans, it will also provide the foundation from which you will work for the rest of the course.

During the course there will be short plenary presentations on the various themes, given by experts in the area, but considerable time will be spent in smaller group discussions and activities. This approach is intended to provide an interactive and participatory arena, within which we can all learn from each other. We all have experiences that we can all benefit from by sharing.

On the final day, in light of what you have learned and discussed, you will be asked to present on your proposed response to strengthen existing School Health, Nutrition and HIV Prevention Programmes.

Certificates
At the end of the workshop, participants will be awarded with certificates.

We do hope you find the workshop valuable, beneficial and, above all, enjoyable. We’re very much looking forward to meeting you all soon!

Thank you,
ESACIPAC, WACIPAC and PCD Team
